

New TimeClock Plus Mobile App

To install, you will need to do the following:

1. Uninstall the current TimeClock Plus app
2. Download the new TimeClock Plus v7 app for your phone.
3. Open the app

You should see a screen as below

The screenshot shows the TimeClock Plus mobile app interface. At the top, there is a green header with the text "TimeClock Plus". Below the header, there are several input fields for configuration:

- Scheme:** A dropdown menu currently set to "http".
- Domain:** An empty text input field with a red border.
- Port:** A text input field containing the word "Optional".
- Path:** An empty text input field with a red border.
- Namespace:** A text input field containing the word "OPTIONAL".

Below these fields is a blue "Save" button. At the bottom of the screen, there is a white bar with the text "Home". Above the "Home" bar, the following version information is displayed:

Client Version:7.0.46.5
Server Version:v0000
Revision:34513

In the **Domain** field you will need to try one of the following (starting with 1):

1. Timeclock
2. 10.40.177.47
3. Leave the field blank

If the **Path** is not filled in then use: api/v0000

Click the save button. It might go back to the same screen. If so, you will need to click save again.

You should see the screen below:

TimeClock Plus
